

Your workers are already making you money you're not collecting.

Hands-on work generates data worth \$3–6 an hour, per worker. We set everything up, sell it, and send you a check every month. Nothing on your floor changes.

It costs you nothing.

No hardware, no staff, no software, no minimum commitment.

Nothing changes on your floor.

No new steps. Nobody works differently.

It works anywhere skilled hands do physical work.

Factories, sites, warehouses, hospitals. Every country.

You get paid monthly.

Every hour counted. Every buyer named.

Tuesday, 5 a.m.

Your night shift is loading pallets. That hour is worth \$3–6 per worker. So was yesterday's.

\$3–6

per hands-on hour, per worker, paid to you every month.

100 workers · 6 hands-on hours a day · 22 days = **\$39,600–79,200 a month.**
