Nobody else has what happens on your site. It earns the top of the range.

Rebar, rigging, drilling, harvest. Almost none of it has ever been recorded, which is exactly why it earns the high end.

Scarce work earns the most.	Field work is the rarest data there is. Rare means the top of the range.
It costs you nothing.	No hardware, no staff, no software, no minimum commitment. We fund all of it.
Nothing slows down.	No new steps. Nobody works differently. Throughput is untouched.
Paid monthly.	Every hour counted. Every buyer named. A statement you can check.
In low-wage countries it beats payroll.	At $3–6 an hour, a worker earning $1 an hour costs you nothing. Or less than nothing.

$3–6 per hands-on hour, per worker, paid to you every month.

100 workers · 6 hands-on hours a day · 22 days = **$39,600–79,200 a month.**

Illustrative figures. Terms set in your agreement.
